EDUCATION

University of Passau, Germany Master's Degree in Computer Science (Double Degree Program)	Jan 2024 — Present
National School of Computer Science, Tunisia Engineering Studies in Computer Science (Double Degree Pathway)	Jan 2022 — Jan 2024
Preparatory Institute for Engineering Studies of Monastir (IPEIM), Tunisia Preparatory Degree for Engineering Studies	Jan 2020 — Jan 2022

EXPERIENCE

Software Engineer Intern Mammut Web Solutions	Jul 2024 — Aug 2024 Tunisia
- Developed a mobile application for food surplus donation and resale, enabling restaurants and hotels to list leftover meals at reduced prices. - Implemented full-stack features with Flutter, Express.js, and MySQL, including real-time inventory updates and a messaging system. - Reduced manual tracking by 70% via smart notifications and backend validations; tested 20+ APIs with Postman for stability and security.	
Software Development Intern Mammut Web Solutions	Jul 2023 — Aug 2023 Tunisia
- Developed frontend features for a pharmaceutical admin dashboard, reducing data-entry time by 50% by implementing a reusable React.js component library and improving Node.js API integration. - Implemented reusable UI component library with role-based access control, reducing feature development time by ~30% and cutting security-related defects by ~25%. - Achieved 90% unit test coverage with JUnit, enabling faster and more reliable deployments.	

PROJECTS

SmartStockManager Next.js, Prisma, Supabase, Vercel	Jul 2025
- Developed a full-stack web app enabling stock management, sales tracking, and earnings analytics. - Built dynamic dashboards with category-wise insights, stock-out prediction, and automated CI/CD deployments. - Ensured reliability with end-to-end testing of key workflows using Playwright.	
RoboServe Flutter, Express.js, MySQL, C++	Oct 2024
- Designed a mobile interface in Flutter for restaurant staff to manage and track orders in real-time. - Implemented a RESTful backend in Express.js + MySQL, coordinating orders with a Bluetooth-connected robot powered by an STM32 microcontroller programmed in C++, and simulating delivery workflows.	
Enterprise Task Management API Java, Spring Boot, PostgreSQL, Docker	Mar 2025
- Developed a secure Spring Boot backend with JWT authentication and role-based access control, enabling task management with auditing, status transitions, and PostgreSQL persistence. - Applied enterprise best practices such as layered architecture, automated testing, and container-based deployment with Docker.	

SKILLS

Programming Languages: Python, C/C++, Java, JavaScript, TypeScript, PHP, Dart
Frameworks & Libraries: React, Next.js, Flutter, Node.js, Spring Boot, Express.js
Databases & Tools: MySQL, MongoDB, Prisma ORM, Git, Docker, GitHub Actions, AWS, Vercel
Testing & Practices: Playwright, Selenium, JUnit, Postman, REST APIs, CI/CD, Agile, Linux
